

Teva-sponsored satellite symposium: The International Headache Congress, IHS and EHF joint congress 2021

Join online: Thursday 9 September, 17:45 –19:15 CEST

The spectrum of CGRP monoclonal antibody use:

Bringing the science to clinical practice

Welcome

Dear colleagues,

With great pleasure, I invite you to join us at this Teva-sponsored satellite symposium, taking place during the virtual International Headache Congress 2021.

Since the introduction of monoclonal antibodies targeting the calcitonin gene-related peptide (CGRP) pathway for migraine prevention, we have seen a wealth of clinical data generation and, more recently, the emergence of real-world evidence. It seems, therefore, timely to reflect on how learnings have and continue to shape best practice.

During this virtual symposium, we will explore the variability of the migraine patient population and consider how CGRP mAbs provide benefits across the spectrum of the migraine clinical experience – from episodic to chronic migraine, those with prior preventive failures and comorbidities, and for patients suffering from various non-headache symptoms associated with migraine. We will also review the latest real-world data and consider their implications for clinical practice.

I hope you will join us for what promises to be an engaging and informative symposium.

Simona Sacco,
Chair

Programme

Welcome
Simona Sacco (Chair)
University of L'Aquila, Italy

**Understanding the Who and the When for CGRP mAbs:
targeting severity and improving function**
Zaza Katsarava
Christian Hospital Unna and University of Essen-Duisburg, Germany

Beyond headache: a focus on associated symptoms
Deborah Friedman
University of Texas Southwestern Medical Center, United States

**Panel discussion: How have practical learnings with CGRP mAbs
changed treatment approaches for best practice?**
All

How does the science translate to the real world?
Larry Charleston IV
Michigan State University College of Human Medicine, United States

Panel discussion and closing remarks
Facilitated by Simona Sacco

To register for the virtual IHC congress, please visit

<https://www.headache-congress.org/registration-abstracts/registration>

The symposium will include the opportunity to address questions to the faculty in a Q & A session.
